

# COVID-19 SUPPORT SYSTEM

ADG Health and WMA have partnered to develop an integrated technology and medical empowered solution to assist businesses mitigate the widespread impacts of the COVID-19 pandemic.

## Challenge:

The risk of exposure to COVID-19 is becoming increasingly difficult for businesses to manage, particularly as many workplaces manage changing government requirements and hybrid remote workforces.

Businesses and institutions need to maintain productivity without placing unnecessary risk upon themselves, their people or their customers.

## Solution:

The COVID-19 Support System is a non-invasive risk mitigation system designed to facilitate a safe and healthy environment for workforces operating during this pandemic.

<b>Thermal Screening System</b>	Early detection & isolation of potentially infected individuals
<b>On-demand Medical Support</b>	Immediate access to medical expertise through telehealth service for full workflow
<b>Digital Risk Management</b>	Automated and transparent workflow to confidently manage the process

The overall system can be scaled and adapted to suit the complexity of the situation, from a base model infrared camera system to fully integrated holistic risk management system.

### THERMAL ALERT SYSTEM

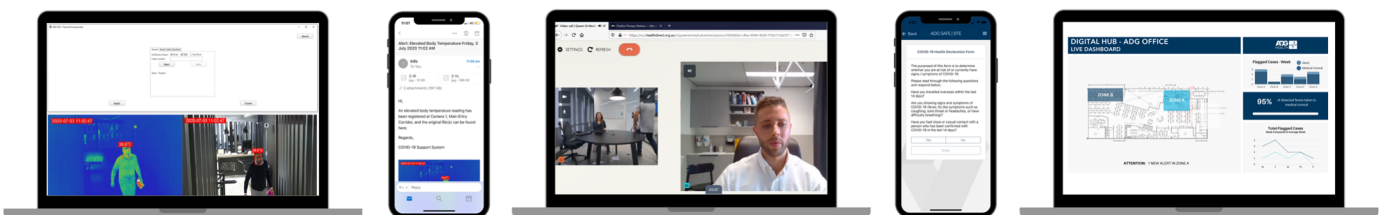

- Automated thermal screening using fixed Infrared Camera with facial detection and Thermal Alert Application –
- Automated email & SMS alerts automatically sent to responsible site personnel

### SAFE|SITE APPLICATION

- Pre-entry QR swipe sign-in with COVID19 self-declaration form
- Risk Management System linked to WMA Medical Consultation (immediate onsite access)
- Realtime analytics, performance and workforce planning insights

### ADDITIONAL OFFERINGS

- Centralised digital hub to integrate and monitor in-house protocols
- WMA Medical Support Services
- Workplace productivity data analytics platform, integrated with employee health metrics

## Key Outcomes (value adds):

- **Immediate risk mitigation action** – automated alerting of potentially infected individuals and onsite access to consultation from a WMA Medical Practitioner
- **Improved confidence in safety** – proactive risk mitigation system eases concern for wellbeing and improves productivity of workforce
- **One system to manage** – digitally integrated solution brings together disparate data sets

A holistic, end-to-end workflow model allows businesses to maintain productivity without placing unnecessary risk upon themselves, their people, or their customers.
